

British University Esports Championship Points 2021/22

NSE Championship 2021/22

This document defines the allocation of BUEC Points awarded. Please be aware that whilst this document states the number of BUEC Points available, these may be reduced or removed completely if teams incur a penalty during the Championship.

There will be two seasons per academic year

-Winter October 1st to December 31st

-Spring January 1st to April 30th

Each game title awards points once per season using one of the following points models. The model used may be changed between seasons.

Teams will be awarded based on final position. In addition all teams/players must win at least 1 match in order to be eligible for points. All points earned will be rounded up to the nearest whole number.

1. Standard Team Championships
2. Reduced signup
3. Single Player Championships
4. Single player and Team Championship for same Game title
5. Regional Leagues and multiple divisions
6. Tied Finishes
7. Cups
8. Affiliate Leagues

1. Standard Team Championships

The following points table will be used as the basis for how points are awarded in all tournaments. This table will be used for official championship titles with 256 or more teams. Depending on tournament format and attendance it will then be adjusted as explained in sections 2-8 of this document.

2. Reduced signup

Points will be awarded based on the number of teams playing (for single player events each participant will be considered a team). Where applicable the number of participants will be counted as the number of unique teams who compete in the first 3 weeks. Any teams who signup later than this point will not be counted for calculating available points.

If there are less than 256 signups, points available will be reduced. The number of teams awarded points will be calculated by taking whichever is smaller the total number of participants or $(\text{Number of teams over } 64) \times \frac{2}{3} + 64$. Points assigned for reduced signups will be determined using the following table. In addition if less than 32 teams sign up all points earned will be multiplied by $\frac{2}{3}$.

Normal points	Minimum teams for points to be awarded
150	1
140	97

3. Single Player Championships

Single player championships will award half points to an equivalent team championship.

4. Single player and Team Championship for same Game title

If a game has both a Single player and team championship both events will get reduced points. Team events will be worth $\frac{2}{3}$ points of normal championship (this does not stack with tournaments with less than 32 teams penalty). Single player tournaments will be worth $\frac{4}{5}$ the normal single player event. (this does not stack with less than 32 teams' penalty.)

5. Regional Leagues and multiple divisions

If there are multiple equivalent divisions players / teams will be considered tied as if part of one larger tournament. E.g if there is a north and south division, the two teams who finished first in their respective divisions will be considered tied 1st/2nd overall and earn 145 points each. $(150+140)/2=145$

If these equivalent regional divisions are different in size each division will have points awarded separately based on the size of that division. For each division it will be assumed to be part of a larger tournament where all other divisions are the same size as that division. For example if we had 2 divisions North and South with 80 and 90 teams respectively. We would award teams in the south as if they were in a tournament with 160 participants and teams in the north division as if they were in a tournament with 180.

6. Tied Finishes

If teams / players finish tied they all are awarded average points across the tied positions. For example in a team event where 4 teams get knocked out in the quarterfinals all teams finish tied and each earn 65 points the average of 5-8th. $(70+66+62+58)/4=64$

7. Cups

If there is not a championship or affiliate league already awarding points for a game NSE may run up to 3 events per season which award points. These events will award 1/3rd the points of championship of the equivalent size.

8. Affiliate Leagues

In order for a tournament to be given affiliate status it must meet the following requirements:

- Open entry to any students
- All players must be current students
- Teams must be made entirely of students from the same academic institution
- Minimum 8 universities compete
- Minimum 16 teams/players
- There cannot be a championship for the game already awarding points.

Affiliate leagues will award half points to an equivalent official championship.
